## Program Manager (Administrator) Description

This WAH course is designed for people directly responsible for the development or maintenance of a fall protection program. This course is for people that do not work at height but are in an authoritative position for an employer and are responsible to eliminate or mitigate fall hazards encountered by staff. Program owners, program administrators, internal auditors, plant managers, competent persons, process owners, and safety professionals often participate in this course. This course includes content and resources to establish or maintain a fall protection program using an online workshop and is maintained through a Continuing Education Program.

### All WAH Training Includes:

- Work-at-Height Guide for the Fall Protection Professional training manual ([Link to Sample](#))
- Pre-training Needs Assessment
- Professional Instruction meeting ANSI Z359.2, OSHA, State or USACE requirements
- Customized content according to Needs Assessment and applicable jurisdiction
- 1 Year WAH Membership
- Continuing Education Program
- Wall-mount Certificate ([Link to Sample](#))

**Continuing Education:** The Continuing Education Program is available for those wishing to extend their certification.

**Certification:** Includes certification and wall-mount certificate as WAH Program Manager (no expiry date if participating in WAH Continuing Education). Alternative titles according to employers' needs are available for this course.
